

# Bachir Kurdi

**Passionate Frontend web developer with flair for UX/UI design.**

I am a dynamic, innovative, and dedicated front-end engineer with a strong educational background from DTU in process and innovation. My education has provided me with a robust foundation in web design, particularly focusing on UI/UX, alongside professional innovation and problem-solving skills. My experience spans multiple roles where I have successfully designed, built, tested, and optimized products. I bring a blend of theoretical knowledge and practical expertise, honed through various online programming courses and extensive industry experience. I am committed to delivering high-quality, user-centered designs and solutions.

## Work experience

2022 - NOW

### CO-founder & CTO

After some great years in working in different startups and corporate companies, I felt that it was time to embark on my own adventure. In this time I have build 2 companies both venture backed companies. Where I build full-stack applications using react framework NextJS using state of the art technologies. Integrating with AI and vector databases. Setting up CI/CD workflows in AWS and build to solve problems for users.

2018 - 2022

### Software engineer

I have worked as front-end developer for some of Denmarks top tech startups. Companies like **Maersk**, **Valuer**, **Cobiro**, **Consensus** and **SiteAttention**. Where I have worked in Angular, Vuejs, testing using Jest and Jasmin, created Release pipelines with Github and Circle CI to always insure a fast and secure CI/CD pipeline And a lot of other technologies.

2016 - 2019

### Freelance

Design & Webdevelopment, for different startups, where i help to design their brand, and develope their website, here I have utilised what technology that fits the job best. Using simple HTML,CSS & JS to build simple beautiful sides, and later on utilising more state of the art tech like Nuxt to build CMS solutions with vue, but also simple SSP using Nextjs

2017 - 2019

### Technical Manager

I had responsibility at Radio WAIH for the website, both maintenance and development, I'm also responsible for the technical part of the online radio which have over 400 listeners daily.

2018 - 2018

### UI/UX designer

Clumeo is a club and team platform, i started in the company while a major design rework was started, here i worked on redesigning both on web and app.

# Education

2014 - 2018

## **BA degree in Process and innovation**

with additional courses in UX-design and software development.

from the Technical University Of Denmark

2015 - Now

## **Web development (HTML, CSS, JS)**

Through online courses as Udemy and Teamtreehouse

# Skills

## Grafic design

The use of visual tools to tell a story or convey a message, is an important part of my work i have used it many times to make identities for organizations like the radio WAIH logo, or to tell a story like i did with the promotion poster for Syria.

## Web design

i've also have experience with functional design, were the end user and the user experience is the main focus. Test, ittration, and market research etc. is the pillars in my design process, some examples of my work: Waih.dk, Numba.dk, bornehusetnova.dk and cafegriffens.dk.

## App design

I have a wide experience with App programming, i use the newest trends and try to implement it in all my work, also through analysing user behaviour and implementing them in the app, this is how i reach the best results.

## Innovative projects

I also have experience working, with specific case/problem and to work from ground up to a concept or a functional prototype. An example of this is a case my group and i recieved from Space 10(an innovation house that cooperate with IKEA) we made a concept, for IKEA Business collection, were we incorporated selfdriven vehicle technology.

# Volunteer work

2015 - Now

## **Webdesign, Marketing and maintainance of website**

For Viomis, a danish charity organization

Took part in the design of the site viomis.dk,

and are now responsible for the maintenance and updating of the side which have many thousand visitors.

Further more i'm a part of the marketing team were i make marketing material for the projects,

which is shared on their facebook side that have over 12.000 followers

# Languages

Fluent in Oral and Written English, Danish and Arabic
